crunchtime LABOR + ADP Workforce Now

Keep your labor and payroll data perfectly in sync

Connect ADP Workforce Now with Crunchtime Labor to automate data flow between systems, eliminate manual entry, reduce payroll errors, and speed up processing.

Eliminate Duplicate Entry

Managing employee data in ADP WFN creates an automated, single source of truth for Crunchtime. New hires, wage changes, and terminations flow between systems, eliminating redundant admin work and cross-platform discrepancies.

Accurate Payroll Processing

A properly configured employee profile is the foundation of hassle-free payroll. Reviewing and approving payroll in Crunchtime will minimize pay disputes and compliance risks, guaranteeing accurate payroll for your team.

Smarter Labor Optimization

Unify your payroll costs with real-time sales and scheduling data to unlock precise labor reporting.

Getting Started

Our experienced implementation consultants will guide you through each step of the integration process. From planning and configuration to testing and go-live, we make the process as smooth and seamless as possible.

Current customers can submit a Support ticket to get started, or contact Customer Success to learn more.

Important Note: Crunchtime and ADP WFN are highly configurable applications, and every customer's environment may be different. Our direct integration supports standard use cases, but it is not a one-size-fits-all integration for every scenario.

What Data is Synced?

ADP WFN → Crunchtime

- Create Employees
- Update Employees

Crunchtime → ADP WFN

- Payroll Processing

Cost

The ADP Workforce Now integration is available as an add-on service. A one-time implementation fee applies to configure the integration and ensure your systems are set up for success. Please note that ADP does charge customers a fee for utilizing the APIs.
