Keep your labor and payroll data perfectly in sync

Connect Paylocity with Crunchtime Labor to automate data flow between systems, eliminate manual entry, reduce payroll errors, and speed up processing.

Eliminate Duplicate Entry

Managing employee data in Paylocity creates an automated, single source of truth for Crunchtime. New hires, wage changes, and terminations flow between systems, eliminating redundant admin work and cross-platform discrepancies.

Data Integrity and Compliance

Eliminate duplicate profile creation and fragmented records across platforms. Clean, synchronized demographic and role data ensures shifts are assigned to valid, active personnel every time.

Accurate Payroll Processing

A properly configured employee profile is the foundation of hassle-free payroll. Minimize pay disputes by guaranteeing accurate payroll for your team.

Getting Started

Download the latest version of the Paylocity Integration Setup Guide and follow the steps to enable the integration: **https://links.crunchtime.com/SG-PaylocityIntegrationSetup**

Current customers can always elect to opt in for Crunchtime-guided enablement support. Submit a Support ticket to request a consulting Statement of Work, or contact Customer Success to learn more.

Important Note: If you are a Franchisee using Crunchtime via a Corporate contract, you will need to elect the help of your Corporate Administrators throughout the enablement process.

Crunchtime and Paylocity are highly configurable applications, and every customer's environment may be different. Our direct integration supports standard use cases, but it is not a one-size-fits-all integration for every scenario.

What Data is Synced?

Paylocity → Crunchtime

- Create Employees
- Update Employees

Crunchtime → Paylocity

- Payroll Processing - Coming 2027!

Cost

This integration offers a self-service $0 cost enablement option for all Crunchtime customers. Please note that Paylocity does charge customers a fee for utilizing the APIs.
