crunchtime INVENTORY + workday.

Keep your inventory and financial data perfectly in sync

Connect Workday with Crunchtime Inventory to automate data flow between systems, reduce manual effort, and make better business decisions with accurate, up-to-date information.

Improve financial visibility

Keep purchasing, inventory, and financial data in sync so you always have an accurate, up-to-date view of food costs, spending, and business performance.

Track vendor transactions with confidence

Automatically sync purchasing and invoice data to reduce manual entry, improve accuracy, and maintain reliable vendor and financial records.

Simplify month-end close

Reduce reconciliation work with connected financial and inventory data so you can close the books each month with confidence.

Getting Started

Our experienced implementation consultants will guide you through each step of the integration process. From planning and configuration to testing and go-live, we make the process as smooth and seamless as possible.

Current customers can submit a Support ticket to get started, or contact Customer Success to learn more.

Important Note: Crunchtime and Workday are highly configurable applications, and every customer's environment may be different. Our direct integration supports standard use cases but it is not a one-size-fits-all integration for every scenario.

What Data is Synced?

Crunchtime → Workday

- Accounts Payable
- Journal Entry - Inventory
- Journal Entry - Sales
- Journal Entry - Location Transfers

Workday → Crunchtime

- Vendor Records Sync

Cost

The Workday integration is available as an add-on service. A one-time implementation fee applies to configure the integration and ensure your systems are set up for success.
