CRUNCHTIME! SERVICES

Supercharge CrunchTime with an Accelerator!

The CrunchTime Accelerator Program

It's a simple, powerful idea: we dedicate an expert from our Client Services Group and they help you wring the maximum savings of time and money out of CrunchTime.

Make your wish list come true. They can help with…

- **Training and support of the Super User and Help Desk,** saving everyone time
- **LTO rollout and data analysis** - we can enter the data and then show you how well it worked!
- **End-user training** to teach your GMs how to recognize and remove excess costs
- **Database maintenance** so you're always working with the most accurate information
- **Best practices for data mining** to deliver the best quality intel for your business decisions
- **Participation in Operations project meetings** for instant feedback on using CrunchTime to support your plans
- **Remote store-level support** of CrunchTime Applications so your end-users make the most of your investment

These are just examples… ultimately you decide what you want them to help with, when, for how long.

What's the cost?

Accelerator services are priced in pre-paid blocks of time; the more time purchased, the lower the hourly rate. Blocks are not refundable, but can be "saved" for up to a year from purchase for use later.

Hours	Cost	Savings
50	$8,000	15%
100	$15,000	20%
150	$21,000	25%

To brainstorm how an Accelerator can help you get the results you need, contact your CrunchTime Customer Success Manager.
